SKILLS

Languages: Java, Python, TypeScript

Databases: MySQL, MongoDB, Redis

Frameworks: Spring Boot, Angular, Flowable

Technologies: BPMN

Architecture & Services: REST API Design, Microservices, AWS, Design Patterns, Low-Level Design (LLD), Domain-Driven Design (DDD)

WORK EXPERIENCE

Associate Engineer

2023 – Present

Finzly Inc.

Chennai, India

- Build and maintain scalable banking products including payment systems, Forex, and SWIFT ISO-based payment flows, contributing across backend, frontend, and API layers.
- Design REST APIs and microservices with Spring Boot and Angular, using AWS services, caching, async communication, and BPMN workflows to deliver scalable solutions.
- Work in Agile/Scrum teams for iterative delivery and mentor new engineers after progressing from trainee to associate role.

Intern Engineer

Aug 2022

Centre for Development of Advanced Computing (CDAC)

Chennai, India

- Completed training and certification in cloud computing and data analytics
- Built proof-of-concept cloud workflows and learned virtualization techniques

EDUCATION

B.E. in Computer Science and Engineering

2023

Government College of Engineering, Dharmapuri

CGPA: 8.26

Higher Secondary Certificate (HSC)

2019

Vaani Matric Higher Secondary School, Vaniyambadi

Percentage: 81.3%

PROJECTS

Tedi – Text Editor with Learned Suggestions (BiLSTM)

Jan 2022

- Developed an intelligent text editor that learns user typing patterns and predicts the next word using a customized BiLSTM language model.

Phonebook – Efficient Search (Trie)

Jan 2022

- Implemented a Trie-based search algorithm in Python to significantly improve contact lookup performance, with data persistence using SQLite.

Global Sales Data Analytics

Oct 2022

- Collaborated with IBM to build data analytics dashboards and reporting workflows using Python and IBM Cognos.
- Performed ETL operations and visualized global sales trends to support business decision-making.

Math Riddles (Interactive Quiz)

Mar 2022

- Developed an interactive math quiz application with adaptive difficulty, scoring, and persistent data storage using Python and SQLite.
